

Technical Data Sheet

American Road Patch™
patented

General Description

American Road Patch is a composite material consisting of asphalt compound, fiberglass mat and aggregate coated in a patented especially engineered to form waterproof seal of potholes local repairs.

ASPHALT COMPOUND:

A polymer modified paving grade type asphalt

MAT:

A moisture-resistant, waterproofing, high tensile mat made form a unique fiberglass scrim embedded between two lightweight polyester geotextiles. This mat is proprietary but is currently used in the paving industry. This mat is the carrier for the asphalt compound.

AGGREGATE:

Crushed 6x10 aggregate applied to the exposed surface of American Road Patch. Aggregate used in paving industry, source proprietary.

Technical data

Item FGE25076	Unit	Value
Tensile Strength	kN/m	50
Thickness	mm	3,18 – 4,76
Roll width	m	1
Roll length	m	6,4
Roll area	m ²	6,4
Roll weight (including wrapper)	kg	31,8 - 34
Material	Asphalt patch reinforced by fiberglass mat with aggregate on the top site.	

Date: 15.06.2020
